Subject Index

Acoustic emission monitoring
  acoustic emission monitoring of stress corrosion cracking, 185
Alloys
  creep damage nucleation sites in ferrous alloys, 97
  influence of retrogression and reaging treatments on the strength and stress corrosion resistance of aluminium alloy 7075-T6, 223
  life prediction by mechanistic modeling and system monitoring of environmental cracking of iron and nickel alloys in aqueous systems, 167
Aluminium
  influence of retrogression and reaging treatments on the strength and stress corrosion resistance of aluminium alloy 7075-T6, 223
Aqueous environments
  life prediction methods for aqueous environments, 193
Aqueous systems
  life prediction by mechanistic modeling and system monitoring of environmental cracking of iron and nickel alloys in aqueous systems, 167

Ceramics
  mechanisms of fatigue crack propagation in metals, ceramics and composites: role of crack tip shielding, 15
Chromium
  a critical review of precipitation behaviour in 1Cr–Mo–V rotor steels, 263
  evidence of photoreductiuon in thermal oxides formed on chromium, L5
Closure
  ultrasonic measurements of crack tip shielding by closure, 37
Closure effects
  a unified model for fatigue crack initiation and growth, with emphasis on short-crack behavior, crack closure effects, variable-temperature fatigue and creep–fatigue interaction, 71
Composites
  mechanisms of fatigue crack propagation in metals, ceramics and composites: role of crack tip shielding, 15
Copper
  a note on dislocation-cell structures in commercial copper, L1
  effect of low temperatures on the cyclic stress–strain response and high cycle fatigue life of polycrystalline copper, 233
  wettability of hot-pressed silicon nitride materials by liquid copper, 277
Corrosion
  acoustic emission monitoring of stress corrosion cracking, 185
  influence of retrogression and reaging treatments on the strength and stress corrosion resistance of aluminium alloy 7075-T6, 223

Crack growth
  acoustic emission monitoring of stress corrosion cracking, 185
  a unified model for fatigue crack initiation and growth, with emphasis on short-crack behavior, crack closure effects, variable-temperature fatigue and creep–fatigue interaction, 71
  creep crack growth under transient conditions, 125
  mechanics of damage, crack growth and life prediction under creep conditions, 115
  mechanisms of fatigue crack propagation in metals, ceramics and composites: role of crack tip shielding, 15
Crack initiation
  localized corrosion and crack initiation, 143
Crack tip shielding
  mechanisms of fatigue crack propagation in metals, ceramics and composites: role of crack tip shielding, 15
  ultrasonic measurements of crack tip shielding by closure, 37
Creep
  a unified model for fatigue crack initiation and growth, with emphasis on short-crack behavior, crack closure effects, variable-temperature fatigue and creep–fatigue interaction, 71
Creep crack growth
  creep crack growth under transient conditions, 125
Creep damage
  creep damage nucleation sites in ferrous alloys, 97
Creep fracture
  mechanisms and controlling factors in creep fracture, 103
Creep life
  physically based modelling of remanent creep life, 111

Damage
  mechanics of damage, crack growth and life prediction under creep conditions, 115
Deformation
  bulk deformation fatigue damage models, 3
Diffusivity
  measurement of the low temperature diffusivity and solubility of tritium in an iron-base superalloy, 257
Dislocation-cell structure
  a note on dislocation-cell structures in commercial copper, L1

Environmental cracking
  life prediction by mechanistic modeling and system monitoring of environmental cracking of iron and nickel alloys in aqueous systems, 167

Fatigue
  a unified model for fatigue crack initiation and growth, with emphasis on short-crack behavior, crack closure effects, variable-temperature fatigue and creep–fatigue interaction, 71

© Elsevier Sequoia/Printed in The Netherlands

bulk deformation fatigue damage models, 3
mechanisms of fatigue crack propagation in metals, ceramics and composites: role of crack tip shielding, 15
Fatigue life
effect of low temperatures on the cyclic stress–strain response and high cycle fatigue life of polycrystalline copper, 233
Fracture mechanics
crack tip modeling of hydrogen environment embrittlement: application to fracture mechanics life prediction, 157

Hydrogen environment embrittlement
crack tip modeling of hydrogen environment embrittlement: application to fracture mechanics life prediction, 157

Iron
life prediction by mechanistic modeling and system monitoring of environmental cracking of iron and nickel alloys in aqueous systems, 167
measurement of the low temperature diffusivity and solubility of tritium in an iron-base superalloy, 257

Laser
role of thermal conductivity and optical absorption coefficient of amorphous silicon in pulsed laser melting, 273
Life extension
residual life techniques for plant life extension, 131
Life prediction
crack tip modeling of hydrogen environment embrittlement: application to fracture mechanics life prediction, 157
life prediction by mechanistic modeling and system monitoring of environmental cracking of iron and nickel alloys in aqueous systems, 167
life prediction in high temperature environments: overview of a current gas turbine engine approach, 63
life prediction in turbine engines and the role of small cracks, 43
life prediction methods for aqueous environments, 193
mechanics of damage, crack growth and life prediction under creep conditions, 115
residual life prediction methods for gas turbine components, 49
the role of crack growth life prediction in aircraft, 29
Localized corrosion
localized corrosion and crack initiation, 143

Metals
mechanisms of fatigue crack propagation in metals, ceramics and composites: role of crack tip shielding, 15
Molybdenum
a critical review of precipitation behaviour in 1Cr–Mo–V rotor steels, 263

Nickel
life prediction by mechanistic modeling and system monitoring of environmental cracking of iron and nickel alloys in aqueous systems, 167
Niobium
substructure evolution and deformation modes in shock-loaded niobium, 241
Nitrogen
wettability of hot-pressed silicon nitride materials by liquid copper, 277

Optical absorption coefficient
role of thermal conductivity and optical absorption coefficient of amorphous silicon in pulsed laser melting, 273
Oxide
evidence of photoreduction in thermal oxides formed on chromium, L5

Photoreduction
evidence of photoreduction in thermal oxides formed on chromium, L5
Precipitation behaviour
a critical review of précipitation behaviour in 1Cr–Mo–V rotor steels, 263

Reaging treatments
influence of retrogression and reaging treatments on the strength and stress corrosion resistance of aluminium alloy 7075-T6, 223
Residual life techniques
residual life techniques for plant life extension, 131
Retrogression
influence of retrogression and reaging treatments on the strength and stress corrosion resistance of aluminium alloy 7075-T6, 223

Silicon
role of thermal conductivity and optical absorption coefficient of amorphous silicon in pulsed laser melting, 273
Silicon nitride
wettability of hot-pressed silicon nitride materials by liquid copper, 277
Solubility
measurement of the low temperature diffusivity and solubility of tritium in an iron-base superalloy, 257
Steel
a critical review of precipitation behaviour in 1Cr–Mo–V rotor steels, 263
Strain
effect of low temperatures on the cyclic stress–strain response and high cycle fatigue life of polycrystalline copper, 233
Strain rate discontinuity
temperature-dependent strain rate discontinuity, 213
Stress
effect of low temperatures on the cyclic stress–strain response and high cycle fatigue life of polycrystalline copper, 233
acoustic emission monitoring of stress corrosion cracking, 185
influence of retrogression and reaging treatments on the strength and stress corrosion resistance of aluminium alloy 7075-T6, 223
Superalloy
measurement of the low temperature diffusivity and solubility of tritium in an iron-base superalloy, 257

Thermal conductivity
role of thermal conductivity and optical absorption coefficient of amorphous silicon in pulsed laser melting, 273

Tritium
measurement of the low temperature diffusivity and solubility of tritium in an iron-base superalloy, 257
Turbines
life prediction in high temperature environments: overview of a current gas turbine approach, 63
life prediction in turbine engines and the role of small cracks, 43
residual life prediction methods for gas turbine components, 49

Vanadium
a criticl review of precipitation behaviour in 1Cr–Mo–V rotor steels, 263
